- Furnaces

A Lot of Functionality in a Compact Size

Measuring just 6.5 inches wide by 5.7 inches high and only 6.9 inches deep, what's most remarkable about the Chromalox® ECR1 paperless recorder is its vivid TFT LCD screen capable of displaying 256 colors at a true VGA, 640 x 480 pixel resolution.

Plus the Chromalox ECR1 paperless recorder is packed with so much more:

- 18 isolated analog input channels
- Easy-to-access function keys
- Plug-and-play I/O card slots
- User-configurable I/O card
- Ethernet or optional RS-232/422/485 communication
- Flash ROM, compact flash card, or PC data storage
- Expandable, modular architecture
- Portable/benchtop option

To prolong the life of the LCD screen, an infrared detector automatically deactivates the screen when the operator moves away from it and reactivates it when the operator approaches within six feet.

Easy Set-Up and Operation

Soft keys coupled with interactive dialog make setup easy and operation simple. Data display screens are easily configured using easy-to-access function keys. Process data can be displayed in a variety of formats including vertical and horizontal trends, bar graph, numerical, or mixed. Statistics can be presented with instant, average, and minimum/maximum values. Alarms are programmable and can be displayed in a message-style format.

Fast, Highly Accurate Sampling Rate

The sampling rate of the Chromalox ECR1 paperless recorder is fast: within 200 milliseconds for all channels using a programmable filter or moving average sampling method. With an 18-bit A-D analog input and 15-bit D-A analog output, the ECR1 is extremely accurate.

of Its Size with So Many Features

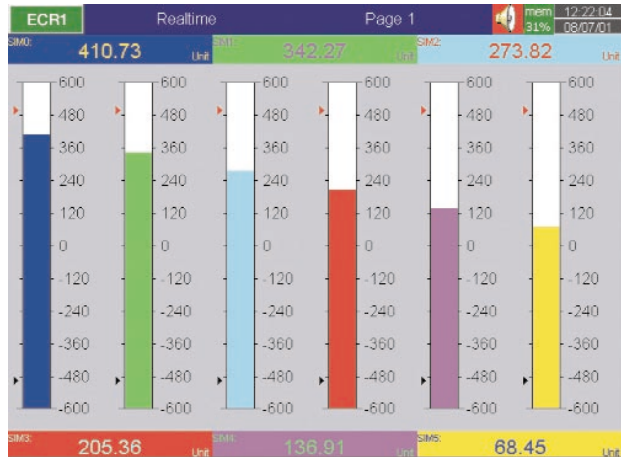

A Variety of Easy-to-Configure, Easy-to-Navigate Displays

Mixed Mode

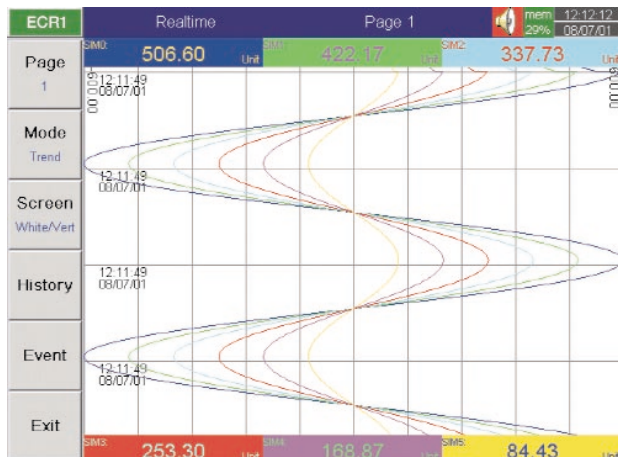

- Displays data in bar graph, line trend, and numeric formats
- View a maximum of 6 mixed, real-time data trends simultaneously
- Different colors and tag names readily identify data trends
- "Page" function key easily switches the view to other configured pages
- Displays current Time/Date
- Reminds user of "Alarm" or "Memory Full" conditions

Bar Graph Mode

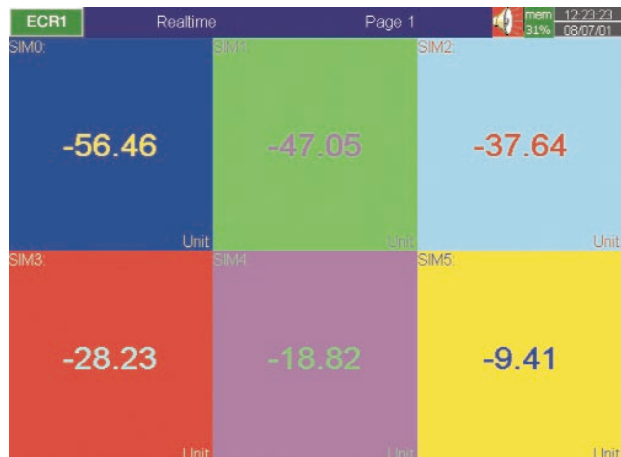

- View a maximum of 6 real-time data values in bar graph format
- Scale set by user in "Configuration"
- Different colors can be used to display data values and tag names with each bar graph
- "Hi/Lo" alarm limits can be marked
- Displays current Time/Date
- Reminds user of "Alarm" or "Memory Full" conditions

Trend Mode

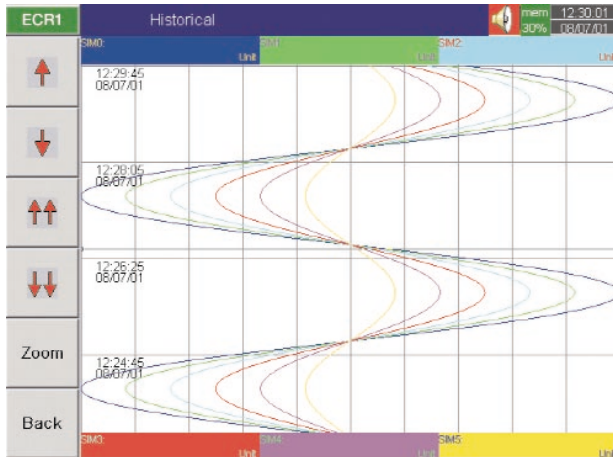

- View a maximum of 6 real-time data trends vertically
- Different colors and tag names readily identify data trends
- "Page" function key easily switches view to other configured pages
- Displays current Time/Date
- Reminds user of "Alarm" or "Memory Full" conditions

Numerical Mode

- View a maximum of 6 real-time data points as numbers
- Different colors can be used to display data values and tag names
- "Hi/Lo" alarm limits can be marked
- Displays current Time/Date
- Reminds user of "Alarm" or "Memory Full" conditions

Historical Mode

- View a maximum of 6 sets of historical data simultaneously
- View desired data sections by using the "Up" and "Down" function keys
- Access precise data values at points selected by moving the "ruler"
- Displays historical data trends and respective data values
- Trends are readily identified by different colors and individual tag names

Configuration Mode

- Configure pen (Input/Output, Pen Name, Event, Job, etc.)
- Configure page (Color, Pen, Decimal, Pen Width, etc.)
- Configure timer
- Configure instrument (Storage Media, Display, Communication, Time/Date, etc.)
